## Professional Summary

Hey, I started my journey as a PHP Developer. After slowly doing multiple tasks in this field, my interest started to shift more toward Javascript, and I started working on it. Now I have over 3+ of experience as a Mern Stack Developer. I have experience with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including HTML5, CSS, JavaScript, Node Js, Express Js, React Js, MySQL, and MongoDB. Strong background in project management and customer relations.

---

  - Blesta
- 

## Work History

### Offshore IT Services Private Limited (A TechRBM Company)

Software Engineer

Mohali– India

Jul 2021, Current

- Developed full-stack web applications using the MERN stack, including the front-end using React.js, back-end using Node.js and Express.js, and database using MongoDB.
- Created RESTful APIs to integrate with front-end applications, enabling data exchange between the client and server.
- Designed and implemented scalable and efficient database structures using MongoDB, ensuring data integrity and security.
- Optimized web application performance by identifying and resolving bottlenecks in the application, such as slow loading times or inefficient queries.
- Collaborated with a team of developers, designers, and project managers to ensure successful project delivery, including code reviews, testing, and deployment.
- Integrated third-party APIs and libraries into web applications to add functionality and improve user experience.
- Used version control tools such as Git to manage code and collaborate with other developers.
- Worked with agile methodologies to ensure timely delivery.
- Troubleshoot and debugged issues in the application, including fixing bugs and implementing patches.

## **Kuroit (UK Based Company)**
